

Graham Hagenah

ABOUT

Full-stack web developer crafting elegant, inclusive digital experiences with a focus on accessibility, performance, and scalability.

EXPERIENCE

Freelance, Web Developer

Sep 2023 – Present, New York, NY

- Builds fast, accessible web products for startups, small businesses, and non-profits using WordPress, static-site generators, and cutting-edge JavaScript libraries and frameworks.
- Translates client objectives into user-friendly designs and interfaces to effectively engage target audiences like donors and volunteers, improving internal processes for fundraising campaigns and event marketing.
- Migrates data and content from legacy websites to modern platforms, streamlining common actions, optimizing search-engine visibility, increasing performance, and enhancing usability for both clients and end-users.

The Predictive Index, Web Developer

Mar 2021 – Aug 2022, Westwood, MA

- Developed responsive pages, templates, and reusable components for our primary marketing website using HTML, CSS, PHP, and JavaScript.
- Built and optimized a React-based event platform for our annual conference, complete with chat messaging, user authentication, and video feeds, attended by thousands of business leaders and technology professionals in 2022.
- Collaborated with designers, engineers, and stakeholders to test and ship scalable features following Agile development practices.
- Championed accessibility principles, overhauling the marketing website and related products to comply with the Web Content Accessibility Guidelines, resulting in a more inclusive and user-friendly experience for all visitors.

Bartlett Interactive, Web Developer

Jun 2019 – Feb 2021, Concord, MA

- Developed transformative WordPress-based websites for 30+ businesses and non-profits in Boston, including schools, libraries, art centers, news publications, medical researchers, and local authors.
- Translated wireframes and design mockups into robust websites and applications using client-side markup and server-side scripting languages.
- Managed all aspects of web projects from initial scoping calls to final delivery, demonstrating exceptional task management and ensuring timely execution of each stage in design and development.
