ABOUT

Front-end web developer focused on crafting elegant, inclusive user interfaces for websites, applications, and digital experiences.

EXPERIENCE

Freelance, Web Developer

Sep 2023 – Present, New York, NY

- Builds fast, accessible web products for small businesses and non-profits using the best tools available, including Content Management Systems, static-site generators, JavaScript libraries, and cutting-edge frameworks.
- Clients include AI-focused startups, independent artists, local businesses, and national organizations like the English Setter Association of America.

The Predictive Index, Web Developer

Mar 2021 – Aug 2022, Westwood, MA

- Developed responsive pages, templates, and reusable components for our primary marketing website using HTML, CSS, PHP, and JavaScript.
- Collaborated with designers, engineers, and stakeholders within a cross-functional operations team to test and ship scalable features following Agile development practices.
- Built and maintained a React-based event platform for our annual conference, complete with chat messaging, user authentication, and live video feeds, attended by thousands of business leaders and technology professionals each year.
- Championed accessibility principles, overhauling the marketing website and related products to comply with the Web Content Accessibility Guidelines, resulting in a more inclusive and user-friendly experience for all visitors.

Bartlett Interactive, Web Developer

Jun 2019 – Feb 2021, Concord, MA

- Developed transformative WordPress-based websites for 30+ businesses and non-profits around Boston, including schools, libraries, and art centers.
- Translated wireframes and design mockups into robust websites and applications using both client-side markup and server-side scripting languages.
- Managed complex projects from kickoff meetings to final delivery, demonstrating exceptional task management and ensuring timely execution of each stage in the design and development process.

EDUCATION

University of Massachusetts Amherst

Class of 2018, Amherst, MA

B.S. Multimedia Informatics (Computer Science, Art, & Marketing)
