

Graham Hagenah

Full-Stack Developer crafting fast, inclusive web products.

EXPERIENCE

Freelance / Web Developer

Sep 2023 – Present

- Builds performant, responsive websites for small businesses and non-profits using WordPress, static-site generators, and front-end libraries.
- Translates client objectives into visually appealing interfaces, enhancing donor and volunteer engagement while optimizing internal processes for fundraising campaigns and event marketing.
- Migrates data and content from legacy websites to advanced platforms, streamlining actions, boosting search-engine visibility, improving performance, and enhancing usability for end-users.

The Predictive Index / Web Developer

Mar 2021 – Aug 2022, Westwood, MA

- Developed responsive templates and reusable components for our primary marketing website using HTML, CSS, PHP, and JavaScript.
- Implemented modern development practices in the WordPress ecosystem, including version control, build processes, hot-module replacement, template inheritance, unit tests, and CI/CD pipelines.
- Built a virtual event platform with React for hosting the annual conference, featuring chat messaging, user authentication, and video feeds, attracting hundreds of business leaders and technology professionals from around the world.
- Collaborated with designers, engineers, and stakeholders to test and ship scalable features following Agile development practices.
- Championed accessibility principles, overhauling the marketing website and related web properties to comply with the Web Content Accessibility Guidelines, resulting in a more inclusive, user-friendly experience for all.

Bartlett Interactive / Web Developer

Jun 2019 – Feb 2021, Concord, MA

- Developed transformative websites for 30+ non-profits in the Boston area, including schools, libraries, and community centers.
- Translated wireframes and design mockups into robust websites and applications using client-side markup and server-side scripting languages.
- Fostered strong client relationships as the primary point of contact from initial scoping to final deployment, proactively addressing concerns and ensuring transparent communication throughout the project lifecycle.
- Implemented rigorous security measures, configuring secure server environments according to best practices to safeguard sensitive data.
